

Take the Gardening for Natives Survey!

Have you converted all or part of your yard to native habitat?

Then we want to hear from you. Your experience gardening with native plants can help other gardeners create buzzing, blooming habitat for pollinators and wildlife. Pay it forward!

Takes ~10 minutes.

Survey closes at the end of February.

Sourcing Plants That Thrive in a Changing Climate

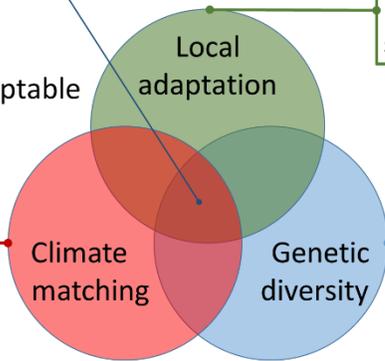

Tom Kaye, Institute for Applied Ecology
Corvallis, OR

Adaptive Sourcing

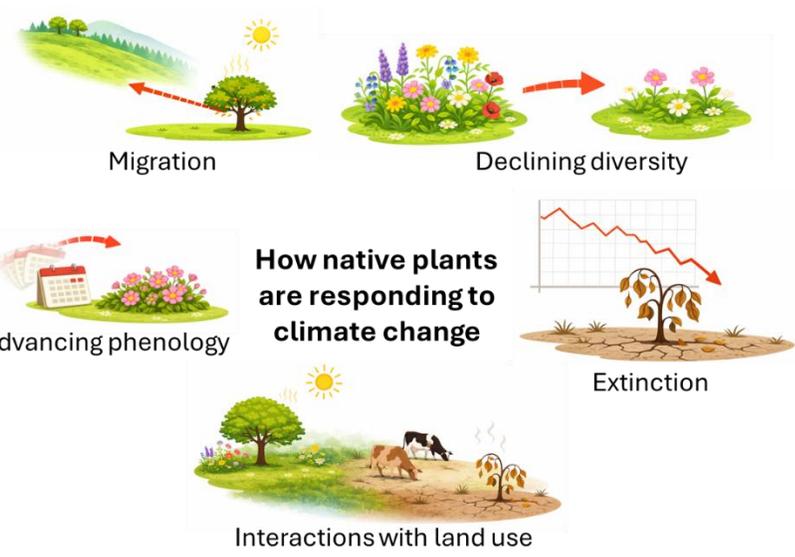

- Diversity
- Adapted and Adaptable

Collect from adjacent future climate-analog locations, import needed genes

Collect locally to leverage "home site advantage"

Collect from multiple sites, including harsh locations and in bad years

Where is our "tomorrow climate" today?

Climate match of today vs mid-century.
Redder colors mean a closer match.
