

TITLE	DESCRIPTION	SPEAKER(S)
A: Herbs: Flavor Your Foods and Feed the Pollinators	Be inspired to try herbs in your garden this year. We will explore types of culinary and aromatic herbs, how to grow them, and how they benefit pollinators. You will leave with ideas for pairing herbs and tips for success.	Brooke Edmunds
B: Not Your Grandmother's Groundcover	Evergreen groundcovers have many advantages over mulch for weed control. This presentation highlights a diverse array of evergreen groundcovers for use in un-irrigated landscapes for superior weed control and year-round interest.	Neil Bell
C: Smart Gardening Strategies for Less Work	Our lives change; our bodies change. Time and energy we can commit to our gardens change. Smart decisions can save us work, keeping gardening a pleasure. Primary focus on landscapes, but relevant for productive gardens, too.	Kathy Clark
D: Use it or Lose it: Rain Gardens and Water Catchment	How can we utilize rainfall? Learn how to detour stormwater runoff into catchment systems, to create rain gardens as interesting landscape features that also reduce runoff, and to collect and store water for irrigation.	Jeff Cope
E: Beautiful, Bountiful Blueberries	Learn how to make your blueberries thrive – from preparation and planting to maintenance and harvest. Learn about types of blueberries, preparing the soil, plant and soil nutrition, pruning, pests, and diseases.	Joleen Schilling
F: Delightful Daphnes	Daphne are well known plants, but many gardeners are only familiar with a few. We will cover a broad range of available Daphne - traditional types, rare varieties, new introductions - and how to grow these delightful shrubs.	Darren Morgan
G: Mulch Matters: Beyond Bark	Everything you didn't know you wanted to know about garden mulches. Benefits to the garden, what types are best for different purposes, which you should avoid, and when and how to use different mulches.	Signe Danler
H: Drought-Tolerant Beauties Year Round	Eliminating irrigation in the landscape reduces both cost and maintenance. An array of drought-tolerant shrubs thrive in our climate and with purposeful selection, you can enjoy blooms year-round in your un-irrigated garden.	Neil Bell
I: All About Alliums: Garlic, Onions, Shallots, and Leeks	The Allium family - garlic, onions, shallots, and leeks - aren't like other vegetable crops. This session will cover how to grow them successfully - varieties to try, when and how to plant, care and feeding, and harvest.	Darren Morgan
J: Roses Rock! A Rose for Every Garden	This presentation will cover types of roses, plant culture, diseases, pests, and pruning.	Paula Lupcho
K: Write it, Remember it . . . Garden Planning Journals	If you save seed packets, plant tags, or garden receipts, you have the beginnings of a garden journal! Learn some journaling ideas that will help you track your successes and/or mistakes and improve your gardening skills.	Donna Cope, Kneque Chaffin

TITLE	DESCRIPTION	SPEAKER(S)
L: Happy Bees, Happy Garden: What Natives to Plant	Creating habitat is a critical way home gardeners can help conserve pollinators. In this talk we will discuss key considerations when selecting plants for pollinators and review some good options for Pacific Northwest yards.	Aaron Anderson
M: Fruits and Veggies in Pots? Yes, You Can!	Whether you live in an apartment or want to spruce up your patio, container gardening can offer a solution to your vegetable and small fruit growing challenges. Let's talk about big gardening dreams in small spaces.	Brenda Bye
N: Glitz and Glam with Trees, Shrubs and Vines	This session will highlight woody plants to consider for your garden including popular trees and shrubs — don't forget the vines — plus plant introductions from OSU Horticulture.	Dan Blanchard
O: Garden Irrigation Simplified	Not all plants are equal in their water needs nor do they have equal rooting depth. We will look at grouping plants with similar water needs and developing watering schedules based on species, root depth, and time of year.	Jeff Cope
P: Firewise Strategies to Protect Your Home	Learn about wildfire risk and steps to reduce risk to your house and yard. We will explore principles of fire-resistant plants and selections for your landscaping. We will brainstorm ways to support your neighbors in this work.	Carrie Berger, Kayla Bordelon, Paula Lupcho
